* The above speeds assume a Line of Sight connection (with the exception of Lite internet service). Where a Line of Sight connection is not available due to location restrictions, internet service speed may not be available as advertised.

ESIS reserves the right to restrict speed on a subscriber's service when the network is under high demand and the subscriber's usage pattern is determined to have negatively impacted the ability of other ESIS subscribers to use and enjoy their internet service. ESIS will attempt to contact the subscriber in order to resolve the issue before access to the service is constricted.
